

About Us

Momentum Learning Services (MLS) is a Sydney based organisation dedicated to designing individually tailored programs that support learning development and behaviour management for individuals with Autism Spectrum Disorders (ASD) and other developmental disabilities.

Our Mission

We are committed to providing high quality learning and behaviour programs for individuals who experience various degrees of difficulty achieving age appropriate developmental, educational and personal milestones. As such, our goal for every individual receiving our services is to develop skills and coping strategies in a manner that is ethical, efficient and effective. Through this process, we aim to provide the individual with the necessary tools to experience their potential as a self-determining, independent and participating member of the community.

Our Clients

We provide a comprehensive array of support services for individuals with Autism Spectrum Disorders and other disabilities. Our clients are generally aged between 18 months and 18 years (but we are able to provide some services to older individuals). While many clients come to us having already received a formal diagnosis, this is not an essential requirement to pursuing treatment. Through MLS, the need for services is evaluated based on the degree and nature of each client's unique strengths and challenges. Though we are located in the Sydney area, we provide these services to clients across Australia and overseas.

Our Curriculum

As our programs are tailored to the requirements of each individual, the particular skills comprised within a program will vary. However all skills taught will follow an age or developmentally appropriate progression that leads to practical application within the natural environment.

Our extensive curriculum covers a variety of skill domains. These include:

- Expressive Communication
- Receptive Understanding
- Adaptive Skills
- Play
- Motor Skills
- Interpersonal Skills
- Social Cognition
- Executive Function

- o Management of Competing Behaviours

Our Treatment Approach

Our programs are based on well established behavioural principles, using the most up-to-date teaching techniques that have been derived from research within this field. To ensure that each of our programs exemplify 'best practice' treatment models, they must meet several criteria:

- o Be individually tailored
- o Reflect typical, developmental goals
- o Incorporate scientifically proven strategies
- o Include high quality training
- o Provide measurable progress indicators

In the course of receiving services the MLS treatment model systematically targets skill acquisition and management of competing behaviours by using positive reinforcement strategies to accelerate learning. By building on each success through repeated practice of those skills targeted, we gradually increase the complexity of what is taught and therefore the individual's ability to be more independent increases also.

The Next Step

For more information or to arrange a **free, Initial Phone Consult**, contact our office via, mail, phone, email, or through our website. An MLS Behavioural Consultant will be able to discuss in detail how our services may be of benefit to you.
