

Little Learners

Little Learners is our early intervention service for children with ASD between 18 months and 8 years of age. The aim of this service is to teach your child skills and reduce competing behaviours which will prepare him/her for entry into the least restrictive educational setting possible. Ideally, this would mean inclusion within a mainstream kindergarten setting.

Skills are taught in a setting that both maximises your child's ability to learn and ensures that the skills will be used in the natural context for which they were taught.

Curriculum, and the emphasis placed on particular skill areas for your child, is individualised according to what your child is developmentally ready for. This information is gathered through an initial assessment and formulated into a series of recommendations. Based on these recommendations, a specific plan is created for teaching your child. As your child progresses, this plan is updated to meet his/her evolving learning needs.

To find out more about this program or any of our other services call (02)80844428 to speak with an MLS Behavioural Consultant.
